TILE COLLECTIONS FOR SPECIFICATION AND RETAIL

Claybrook.

Hello, we're Claybrook

We're a team of creatives with an instinctive feel for what works in interior spaces, who believe that great design can change the way we both live and work. In love with timeless forms, well-crafted materials and products that look and feel just right, we're hugely excited about our new venture. And it's why the team has come together with a collection of tiles for floors and walls with a distinctively Claybrook feel.

The customer is at the centre of what we do at Claybrook. If our customers are happy, we're happy too. We aim to provide an ordering process that works seamlessly at every stage, from product selection through to delivery.

Right now we're focused on tiles, but in time our portfolio will expand to include other interiors product – all equally as tactile and beautifully crafted and each chosen with longevity and durability at its heart.

Alongside our website and showroom, our experienced London-based specification team work with architects, designers and specifiers in the selection process - harvesting materials for each unique project. With access to products from our own production facility and using our carefully chosen core collection, our team can offer solutions to a host of design needs and challenges.

With our love of strong colour and pattern we are thrilled to be able to share with you here our debut collection, which is made up of a series of stylish ranges that are trend-aware but with a touch of historic authenticity.
