

## END-OF-WORK CLEANING

**PORCELAIN TILES, GLAZED CERAMIC  
TILES, ACID-RESISTANT STONE SURFACES,  
TERRACOTTA, QUARRY TILES**

Biodegradable, with plant-derived surfactants.  
Buffered acid: exerts a controlled and effective action over time, does not release dangerous fumes during use.

### COVERAGE

#### APPROXIMATE COVERAGE AND DILUTION (1 litre):

Terracotta 1:5	10/20 m <sup>2</sup>
Porcelain tiles 1:5	40 m <sup>2</sup>
Natural stone 1:5-1:10	20/35 m <sup>2</sup>

The coverage is purely indicative

#### Packaging

1 litre: boxes of 12.  
5 litres: boxes of 4.

#### WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

#### TEMPERATURES

Storage temperature: from 5° to 30° C.  
The product should be applied to materials with temperature between 5° and 30° C.

### WHAT IT'S FOR

- Detergent for end-of-installation washing
- Removes post-application deposits and building-site dirt.
- Eliminates saline efflorescences from terracotta.
- Eliminates lime-scale from floors, showers, bathroom fittings.
- Thoroughly cleans outdoor floors.
- It removes deposits and cleans at the same time because it also contains surfactants.
- Effective against rust stains.
- It helps to remove signs of engobing on ceramic and porcelain tiles surfaces

### ADVANTAGES

- Buffered acid, does not produce harmful fumes for the user and the environment: it does not contain hydrochloric acid.
- Does not change the appearance or colour of materials.
- It cleans but does not attack.
- Does not affect grouting.
- Does not ruin profiles or items in aluminium and steel (kitchen hoods, pipes...).
- Can be used on many surfaces, terracotta, porcelain and ceramic tiles, and acid resistant stone.
- Has many functions: it can clean and remove deposits according to dilution.
- It is also effective in removing grout residues.

### HOW TO USE IT

**Dilution:** between 1:5 and 1:10 according to the level of dirt to be removed.

#### Application:

**For washing after laying and for end-of-work cleaning:** wet the surface well with water before washing. Then use **DETERDEK PRO** diluted at a ratio of 1:5 or 1:10 (1 litre of product in 5 or 10 litres of water). Apply the solution a few square metres at a time, then add, allow contact time of 5 minutes, then work with a single disc cleaner or large brush. Remove any residues using a cloth or liquid vacuum cleaner and rinse with abundant water. Should any stubborn dirt residues remain, repeat the wash with more concentrated solutions.

**For extraordinary maintenance on outdoor surfaces with clear signs of ageing (smog, dust...):** dilute 1 litre of product in 10 litres of water. Then follow the same application procedures described above.

#### Caution:

*Do not use on polished marble or on any materials that are sensitive to acids. Before using on this material, carry out a test on a small surface area to check that it is actually resistant to the product. For items in aluminium, follow the instructions and use a soft sponge.*

- TERRACOTTA
- QUARRY TILES
- PORCELAIN TILES
- GLAZED CERAMIC TILES
- ACID-RESISTANT STONE SURFACES

Some acids might damage surfaces, metals and grouting. **DETERDEK** cleans without affecting materials.

### WHAT IT'S FOR

- Removes post-application deposits and building-site dirt.
- Eliminates saline efflorescences from terracotta.
- Eliminates lime-scale from floors, showers, bathroom fittings.
- Thoroughly cleans outdoor floors.
- It removes cementitious deposits and cleans at the same time because it also contains surfactants.
- Effective against rust stains.

### ADVANTAGES

- Buffered acid, does not produce harmful fumes for the user and the environment: it does not contain hydrochloric acid.
- Does not change the appearance or colour of materials.
- It cleans but does not attack.
- Does not affect grouting.

- Can be used on many surfaces, terracotta, porcelain and ceramic tiles, and acid resistant stone.
- Has many functions: it can clean and remove deposits according to dilution.
- It is also effective in removing grout residues.

### HOW TO USE IT

**Dilution:** between 1:5 and 1:10 according to the level of dirt to be removed.

**Application:**

**Washing after laying:** wet the surface well with water before washing. Then use **DETERDEK** diluted at a ratio of 1:5 or 1:10 (1 litre of product in 5 or 10 litres of water). Apply the solution a few square metres at a time, then add, allow contact time of 5 minutes, then work with a single disc cleaner or large brush. Remove all residues using a cloth or liquid vacuum and rinse with plenty of water. Should any stubborn dirt remain, repeat the wash with more concentrated solutions.

**For extraordinary maintenance** on outdoor surfaces with clear signs of ageing (smog, dust...): dilute 1 litre of product in 10 litres of water. Then follow the same application procedures described above.

**Caution:**

Do not use on polished marble or on any materials that are sensitive to acids. Before using on this material, carry out a test on a small surface area to check that it is actually resistant to the product. For items in aluminium, follow the instructions and use a soft sponge.

#### COVERAGE

With one litre:

Terracotta 1:5.	10/20 m <sup>2</sup>
Porcelain tiles 1:5.	40 m <sup>2</sup>
Natural stone 1:5-1:10	20/35 m <sup>2</sup>

Coverage rate is approximate

#### Packaging

- 1 litre cans in boxes of 12.
- 5-litre cans in boxes of 4.

#### WARNINGS

- Keep out of reach of children.
- Do not disperse into the environment after use.

#### TEMPERATURES

Storage temperature: from 5° to 30° C.  
The product should be applied to materials with temperature between 5° and 30° C.

#### CONTAINS

Non-ionic surfactants less than 5%.  
Other ingredients: perfume.

#### LABELLING

**Warning:** Danger  
**Hazard indication:**  
Causes serious eye damage.  
Causes skin irritation.

**Caution recommendations:**

If medical advice is needed, have product container or label at hand. Keep out of reach of children. Wear protective gloves / eye protection / face protection. IF ON SKIN: wash with plenty of water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER / doctor. Take off contaminated clothing and wash it before reuse. Contains: PHOSPHORIC ACID. Alcohols C12-14, ethoxylated.

#### TECHNICAL FEATURES

**Appearance:** liquid  
**Odour:** pungent with flowery perfume  
**Density:** 1.12 kg/l  
**pH:** 1.5 (solut. 10% in water)

This information is the result of our most up-to-date technical know-how and is based on ongoing laboratory research and testing.
