KENTWOOD LADDER

Care and Maintenance Instructions

IMPORTANT NOTES:

Please Read Carefully & retain these instructions for Future Reference.

General Product Notes
Kentwood Ladder, 520mm (w) x 1275mm (h).
Available in central heating and electric formats. Dual fuel to special order, please contact our showroom for further information.
For this model there is a separate electric element inlet connection on the bottom right hand side.
In addition to the rail you will need to choose a suitable heating accessories pack. **(If ordering an electric element, we will always supply installed on the right hand side, unless requested otherwise)
100% Stainless Steel.
Available in a Brushed Brass finish.
This model has side tapping's so the pipe centres will be dependent on the type of valves. We would advise having the radiator and valves on site before installing your first fix.
Being a traditional style rail, the brackets are not adjustable.
25 Year guarantee on the rail body and 5 years on the finish

USE:

General Care & Maintenance
Provided this product is installed & used in accordance with the instructions, problems should not arise. However, should maintenance be required it should be carried out by a competent person with reference to the instructions. Before any work is carried out the root cause of the problem must be identified.
Under normal circumstances, towel rail surfaces are highly durable however small scratches / marks may occur, if the rail is a Polished Finish these can generally be polished out using a specialist Stainless Steel Metal Polish. If your rail is a Satin or Black Finish please contact us for advice before attempting to polish out any small scratches / marks.

Cleaning
We recommend using a Micro-Fibre Cloth designed for use on Stainless Steel. All that is needed to clean the products is water. Under no circumstances use abrasive, caustic or scouring products as these may adversely affect the finish of the rail. Avoid using chemical cleaners on nearby surfaces such as chemical Tile Cleaners etc as these may cause damage. Limescale ~ should a build-up of limescale occur, it can usually be removed using a 50:50 solution of white vinegar & water applied with a soft cloth & rinsed / dried thoroughly afterwards.

Guarantees
Guarantees in all cases are subject to the products being installed in accordance with British standards as well as those directed by the installation instructions. The guarantee in all cases is restricted to a free of charge replacement or repair of the failed product only. Claybrook Studio Ltd liability will under no circumstances extend beyond the repair or replacement of the product. Claims for either labour to replace the product or damage to property are not admissible.

Spares
Spares can be ordered and purchased from Claybrook Studio should you require replacement parts.
