Installation and Technical Advice

Planning & Layout - All substrates should be flat, sound and dust free. All wet areas need to be suitably waterproofed before the tiles are installed. For further advice on installation please see our Wall and Floor Tiling Guide.

Cutting advice - Use a water-cooled tile cutter and plan the tile layout to avoid cuts less than 15mm where possible. Always cut through the tile with the visible face uppermost and tidy any slight chipping with a rubbing/sanding stone. Ensure the blade is kept clean with a keen cutting edge, otherwise excess chipping will occur.

Sealing advice - No sealer required, though we recommend using Ardex FS grout, which is available to purchase through our website.

For further advice on installation please contact technical@claybrookstudio.co.uk with any questions.

Installation Notes: For wall use only. Tiles may vary in colour from batch to batch.
