72.00 TO 101.00 [2.13/16" TO 4"] Ø64.50 [2 9/16] V158-IS-XX / V158-AIS-XX / V158-AIS-XX

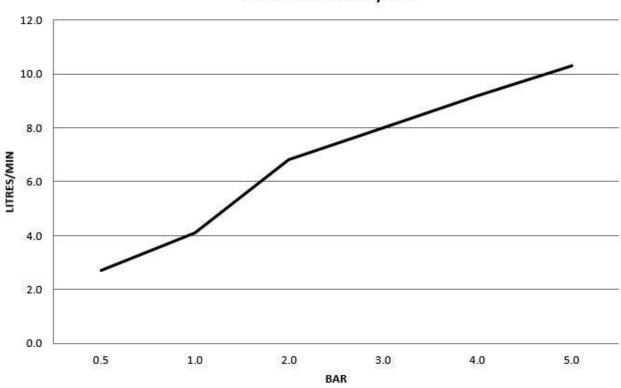

Spares Information

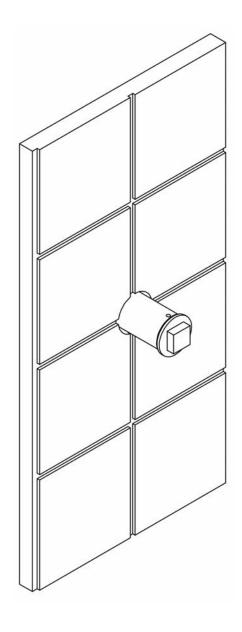

FLOW RATE LITRES/MIN

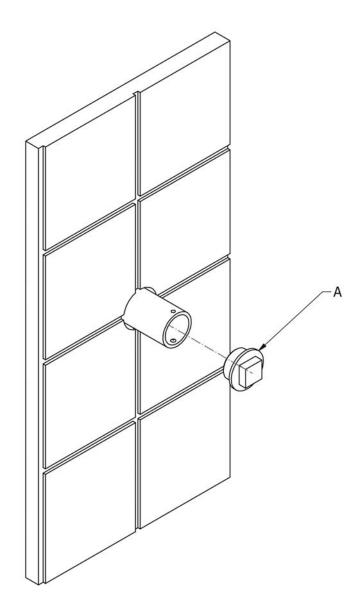

The flow rate data provided in this document is indicative of each product and is given in an open outlet condition. Installation design, external connections and fittings not supplied may affect the data provided.

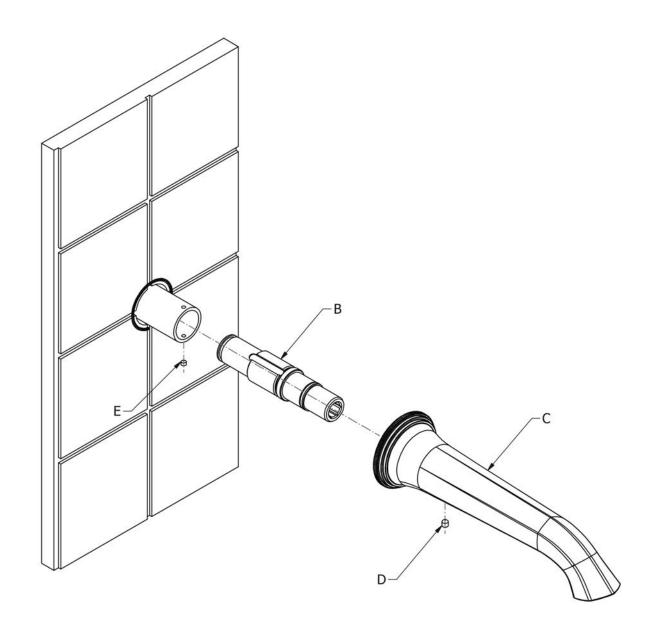

1. Install the finished surface, ensuring the finished surface is in accordance with the minimum and maximum installation depths shown on the drawings in the front of this booklet.

- 2. Ensure the supply to the installation system is isolated.
- 3. Remove spout outlet cap (A).

- 4. Screw spout tail (B) into the installation kit and secure using grub screw (E). Ensure grub screw (E) is fully tightened.
- 5. Apply suitable silicon sealant to the wall where the spout assembly (C) will sit. Slide spout assembly (C) onto spout tail (B).
- 6. Align spout assembly (C) and secure using grub screw (D) and an Allen key as shown. Ensure grub screw (D) is fully tightened.

IMPORTANT NOTES

- 1. Installation should be carried out by a competent engineer, in accordance with water regulations.
- 2. Before installation, ensure supply pipes are flushed clean. Debris or loose particles will affect the efficiency of the ceramic disc cartridge.
- 3. For mixer taps, it is recommended that hot & cold pressures are equally balanced.
- 4. To help maintain the high quality finish, please clean with a soft damp cloth.

 Do not use abrasive polish or cleaners. Stains may be removed using undiluted washing up liquid.
- **5.** Ceramic cartridges in hard water areas. To prolong the lifespan and reduce servicing periods of your tap we recommend that a suitable water softener be fitted. Consult your installer/designer for details.
- 6. Please note that as with all tap and shower ware it will be necessary from time to time for the products to be serviced, this should be carried out by a qualified Plumbing Engineer.
